

Name	POC-600-AC-15A-40V
Features	Four ranges: 15 mA, 150mA, 1,5A et 15A Frequency: from 2 to 3500 Hz
Specific feature	It is possible to create a three-phase current generator when the outputs of three generators POC-600-AC-15A-40V are connected in star. This generator can be used as an current amplifier because it includes a "Pilot" input and a current image output.
Form	Width 19" Hauteur 4U
Documentation	User Manual MU-RC2085
Technical reference	RC2085

The current generator « POC-AC » is built in linear technology.

It includes:

- An internal synthetizer to create a sinewave,
- Two measurements systems:
 - Measure of the current
 - Measure of the voltage

Its control is made by:

- A touchscreen width 5,7" for local control
- Two communications links for a remote control: RS232 and Ethernet

Specification may change without notice.
